Evolution: The biggest hoax of the century!

1. The Theory of Evolution

a. The definition of evolution: The word "evolution" describes a _____ _____ from a lower, simpler, or worse state to a higher, more complex, or better state. (Webster's Dictionary)

The evolution of man involves a supposed "process by which, through some sort of aggregation of matter though many _____ and countless _____ _____, by _____ or by some undetected, impersonal law, man appears."

b. The hypothesis of evolution: The evolutionist _____ that life evolved in this way:

1) From _____ to _____
2) From _____ to _____
3) From _____ to _____
4) From _____ to _____

c. The flaws of evolution:

1) Evolution is actually _____.

True science is the discovery of facts (laws or principles) based on the "collection of data through _____ and ___ _____."
One species forming into another has _____ been _____ _____ (seen by man), nor has it been _____ in a lab.

Therefore, evolution is not fact, but _____. A blind faith based on unprovable assumptions.

2) Evolution has no valid answer for the _____ _____.

What started the "Big Bang?" Where did the original substance from which "life evolved" come from?

3) Evolution contradicts the first and second Laws of Thermodynamics.

a) The first Law of Thermodynamics notes that in all real processes, the _____ of _____ _____ and/or _____ stays constant, even though it frequently changes form (EX: ice to water, rock to sand, etc.). This law proves that nothing is being either "created" or "evolved" by the present processes.

b) The second Law of Thermodynamics (one of the best-proven laws of science) says that the whole universe is _____ into complete disorder. The universe is _____ nor becoming _ _____ nor gaining higher _____ _____ with time, but rather is _____ _____with time, becoming less ordered, leading toward entropy (an inferior change of energy and matter) [cp. Psalm 102:25-27].

Example: The sun and stars irretrievably emit millions of tons of energy every day, and given enough time would eventually burn out of existence.

4) Evolution contradicts known <u>biological facts</u>.

a) Through "mutations" ___ _____ _____ form has ever evolved.

b) The chromosome count in plants and animals and humans is totally _____.

c) The distinct _____ in life forms prevents them from evolving into a new species (like begets only like).

d) Life forms may _____ to a new environment (as certain moths and butterflies have done) but they never <u>evolve</u> into new categories of life forms. Adaptation (sometimes called: "micro-evolution") is possible, but evolution is not scientifically possible.

5) Evolution has no proof of <u>intermediate species</u> ("<u>missing links</u>")

The _____ or _____ between inorganic and organic, between plant life and animal life, and between animal life and man has never been scientifically proven. (EX: There is no valid link between man and ape)

6) Evolution is <u>statistically</u> _____.

The statistical probability that the complex and ordered universe would result from chance processes, ungoverned by a personal intelligent, deliberate Designer, is virtually nil.

"The statistical probability of the ordered cosmos resulting from spontaneous generation (evolution) is considerably less than the probability that an explosion in a print shop would produce a dictionary."

The fact that the sun is just far enough from the Earth that we don't burn up and just close enough that we don't freeze up, is too precise to be mere chance.

7) Evolution contradicts _____.

To believe it was by <u>chance</u> or by <u>accident</u> that a detailed, aesthetic (beautiful), vast, and orderly universe came into existence is irrational.
No one wearing a <u>wrist watch</u> today would be foolish enough to assume that it spontaneously made itself. The design demands a designer.

Note: At the present rate at which the world's population is increasing, if mankind has been in existence as long as the evolutionists claim, the world would be over-filled with people.

8) Evolution contradicts the clear statement of _____ about origins.

a) Genesis 1:1 - In the beginning God created the heaven and the earth.

b) Matthew 19:4 - And he answered and said unto them, Have ye not read, that he which made them at the beginning made them male and female,

Note: To deny the Genesis account of Creation is to deny the words of _____.

c) Hebrews 11:3 - Through faith we understand that the worlds were framed by the word of God, so that things which are seen were not made of things which do appear.

d) Evolution contradicts the Biblical principle that plants and animals only produce "_____" (Gen. 1:11, 12, 21, 24, 25). This truth, though written thousands of years ago, is scientifically validated today!

d. The motive of evolution

What caused man to think up such a theory?

Basic answer: Sinful man does not want to be _____ to a Creator God.

Fallen man wants to make a way to leave God out of the origin of life, so that he does not have to acknowledge the Creator's authority and glorify Him. Evolution is so readily accepted simply because it gives man the "luxury" of keeping the concept of God out of his life and conscience (Jn. 3:19-20).

e. **See: Romans 1:18-32 -**

1) The real reason for evolution - V. 18 - "Men hold (hold down, suppress) the truth in _____."

2) The inexcusableness of evolution - V. 19-20 - Creation clearly points to a Creator (and His power and authority).

3) The end result of evolution - V. 21-32
   a) _____ lives and _____ eyes (v. 21)
   b) _____ and _____ (v. 22)
   c) _____ (materialism) (v. 27)
   d) _____ (v. 24-32)

   If there is no God, then there are:
   (1) No _____
   (2) No _____
   (3) No _____
   (4) No _____ or embarrassment for sin
   (5) No _____ of judgment

If a Creator exists, these are some of the resultant consequences (consequences that a sinful man does not want to acknowledge):

1) I am _____ by the Creator.
2) I am _____ to the superior Creator.
3) I am _____ to the Creator.
4) I will be _____ (held accountable) by the Creator.
5) I should live for the _____ and _____ _____ of the Creator.
6) I am not the _____ of my life.
7) I cannot live _____ _____ I please.
